# SYSTEMS

Wide Width, Two Station Cleanroom Coating/Laminating Line

# NEW ERA Systems

Providing a state of the art converting line requires experience with web processing machinery, understanding of the necessary components which make up the system, and the ability to seamlessly integrate them. Our staff delivers years of web converting experience, and our in house pilot line facilities and unwind/winder test stand assist customers in defining their process needs. Our customers benefit from our background in providing purpose built components for every part of a converting line, and our process and controls expertise allows us to deliver fully integrated, seamless systems.

With experience in a wide variety of webs (papers, films, foils, foams, fabrics, glass, and coils), speeds (0.5-3,000 fpm), and widths (0.5"-240"), look to New Era to provide you with a system engineered for maximum productivity.

Two Sided Coater With Tower Dryer

Cleanroom Pilot Line

High Speed PVDC Coating Line

Coating & Lamination Line

Silicone/Hot Melt Adhesive Coating Line

Narrow Width Precision Coating Line

Purpose Built Embossing Line

Coating & Laminating Line

# We are **NEW ERA**

New Era Converting Machinery is a world leader in processing equipment for the web converting industry. Conveniently located in a 48,000 square foot facility in Northern New Jersey, New Era offers a wide variety of web converting equipment including: unwinds, winders, coaters, laminators, embossers, dryers, drive and control systems, roll handling equipment and web handling systems. From simple components and sections to fully integrated high- speed automatic process lines and systems, New Era can engineer a solution to meet your requirements.

New Era's customer driven approach to equipment engineering and design allows users to obtain systems that are tailored to their needs. Our Process and Design expertise allows us to tackle even the most challenging applications in an efficient, cost-effective manner. Demanding practices are employed in the manufacturing, assembly and testing of every piece of equipment we provide.

New Era is committed to incorporating cutting-edge technology into its products. We maintain a fully operational, highly flexible Pilot Line Facility as well as a production scale Unwind/Winder Test Stand System, allowing us to work with our customers in developing new equipment and processes. Several of our Patents have assisted customers in meeting their needs.

New Era offers complete Turnkey Services for all of its products. Our experienced staff can provide these services around the world in a professional, timely fashion.

No matter how small or how large your needs are, look to New Era to provide you with a solution engineered for maximized productivity.
