NEW ERA

Web Handling and Processing Equipment

New Era manufactures a wide variety of Web Handling and Processing Equipment to supplement its Unwinds, Coaters, Dryers, Winders, and Drive/Control Systems. Whether they are purchased separately or as part of a complete system, each unit is engineered and manufactured to meet the user's needs. Let New Era provide you with the equipment necessary to handle and process your webs.

Multi-roll Cooling Section

Web Handling

Integral to any web converting operation is the ability to convey the web through the process. Performing this without adversely affecting the web is critical. New Era's understanding of the problems that may occur and the requirements to avoid them comes from our experience in handling a wide variety of webs under a multitude of conditions. Our engineering abilities allow us to provide equipment that matches the customers' needs, whether it's simply to move the web from point to point, or to perform tasks such as treating, heating, cooling, and conditioning.

Straight Through Lacing Accumulator

Web Processing

A wide variety of processes are often incorporated into web converting lines. Whether these processes are the primary function of the line or ancillary to the product, the equipment provided must fulfill the process requirements. The experience and expertise we have in producing processing equipment, as well as our knowledge of integrating these systems into a converting line is utilized for each application.

We are **NEW ERA**

New Era Converting Machinery is a world leader in processing equipment for the web converting industry. Conveniently located in a 48,000 square foot facility in Northern New Jersey, New Era offers a wide variety of web converting equipment including: unwinds, winders, coaters, laminators, embossers, dryers, drive and control systems, roll handling equipment and web handling systems. From simple components and sections to fully integrated high- speed automatic process lines and systems, New Era can engineer a solution to meet your requirements.

New Era's customer driven approach to equipment engineering and design allows users to obtain systems that are tailored to their needs. Our Process and Design expertise allows us to tackle even the most challenging applications in an efficient, cost-effective manner. Demanding practices are employed in the manufacturing, assembly and testing of every piece of equipment we provide.

New Era is committed to incorporating cutting-edge technology into its products. We maintain a fully operational, highly flexible Pilot Line Facility as well as a production scale Unwind/Winder Test Stand System, allowing us to work with our customers in developing new equipment and processes. Several of our Patents have assisted customers in meeting their needs.

New Era offers complete Turnkey Services for all of its products. Our experienced staff can provide these services around the world in a professional, timely fashion.

No matter how small or how large your needs are, look to New Era to provide you with a solution engineered for maximized productivity.
