NEW ERA

Laminators, Embossers & Calenders

Different applications call for different processes. New Era goes beyond unwinds, winders, and coaters, producing laminators, embossers, calenders, and even specialty equipment for both general purpose and cleanroom needs.

Specialty
Embossing Line

Laminating Equipment

New Era can provide you with a laminating system engineered around your pressure, temperature, width and configuration requirements. From low pressure, narrow width, ambient temperature nips to high pressure, high temperature, wide width applications, New Era can provided you with the proper equipment for your application.

Purpose Built
Laminator with Backup Roll

Embossing Equipment

New Era embossing equipment is custom engineered to meet your process requirements. Our experience with a wide variety of embossing methods and processes goes into the design of every embossing system we provide.

Cleanroom Laminator

Calendering Equipment

Look to New Era to provide you with a calendering designed to meet your process requirements. With experience in a wide variety of applications, our experts have the knowledge you can rely on when developing your process.

Specialty Equipment

New Era takes great pride in engineering a solution for your specific web handling needs. Whether you are simply combining two webs, or doing a multi-layer, high temperature and pressure embossed lamination, New Era will provide you with equipment you can rely on.

Narrow Web Embossing Line

Cleanroom Equipment

New Era takes great care in the design of its clean room laminators, embossers, and calenders to both minimize the number of debris generating components on the equipment as well as shroud any moving components under enclosures. This leaves a clean configuration between the frames, with all machine members being of nickel plated or stainless steel construction.

Cleanroom Embosser/Laminator

Laminator with Machine Direction Adjustment

Purpose Built Embosser

Tandem Calender

We are NEW ERA

New Era Converting Machinery is a world leader in processing equipment for the web converting industry. Conveniently located in a 48,000 square foot facility in Northern New Jersey, New Era offers a wide variety of web converting equipment including: unwinds, winders, coaters, laminators, embossers, dryers, drive and control systems, roll handling equipment and web handling systems. From simple components and sections to fully integrated high-speed automatic process lines and systems, New Era can engineer a solution to meet your requirements.

New Era's customer driven approach to equipment engineering and design allows users to obtain systems that are tailored to their needs. Our Process and Design expertise allows us to tackle even the most challenging applications in an efficient, cost-effective manner. Demanding practices are employed in the manufacturing, assembly and testing of every piece of equipment we provide.

New Era is committed to incorporating cutting-edge technology into its products. We maintain a fully operational, highly flexible Pilot Line Facility as well as a production scale Unwind/Winder Test Stand System, allowing us to work with our customers in developing new equipment and processes. Several of our Patents have assisted customers in meeting their needs.

New Era offers complete Turnkey Services for all of its products. Our experienced staff can provide these services around the world in a professional, timely fashion.

No matter how small or how large your needs are, look to New Era to provide you with a solution engineered for maximized productivity.
